

FOCUS GROUP

\$125 Stipend

FAMILY VOICES WANTS TO KNOW WHAT YOU THINK

Family Voices and the American Academy of Pediatrics want to know what **young adults with special health care needs** think about influenza (flu) vaccinations.

When it comes to flu vaccines for YSHCN:

- What information do you want to know?
- What concerns might you have?
- What type of messaging would help you understand the importance of a flu vaccine?
- How would you like to learn about flu vaccines to make an informed decision about getting immunized for influenza?
- Who is your most trusted source of information about the importance of a flu vaccine?

Families Voices is convening a focus group to learn what Young Adults with Special Health Care Needs know AND what else they want to know about flu vaccine.

- The focus group will be virtual, in English, and will last 75 minutes.
- Participants will receive a \$125 stipend in recognition of their time.
- The information learned during the focus group will be shared with the AAP. ***Your name and any personal identifying information about you will not be shared or reported.***

To be eligible to participate, you must be a:

- Youth/Young Adult with special health care needs between the ages of **18 and 26 years**.

The Focus Group will take place on: Wednesday, June 2, 2021. 3-4:15pm ET; 2-3:15pm CT; 1-2:15pm MT; 12-1:15pm PT

If interested, please complete the survey at <https://www.surveymonkey.com/r/AAP-YSHCN> by 8 pm ET, Thursday, May 27.

Note: Invitations to participate in the focus group will depend on your age, geography, race, and ethnicity to ensure we hear from young adults who are representative of the population of the country. Only the focus group participants will receive a stipend.
