CHILDREN AND VACCINATIONS

Children ages 5 and up can get vaccinated. Vaccines are safe and effective for children.

Dosage vary by age on the day of vaccination. Children ages 5 through 11 years will get an age-appropriate dose.

Vaccine side effects can include, sore arm, tiredness, headache, muscle pain, nausea and fever.

If your child has a fever or achiness after a vaccination, you can give them a non-aspirin pain reliever

Your child will need a second shot of the Pfizer-BioNTech vaccine three weeks after their first shot.

Vaccines keep us safe, and help us to protect our siblings, family, friends and the community.
